Stamp Set

**Designer's Tips:**

Create a contrasting card front through creating colored animal images using the stencil set and a black and white outlined animal stamp! Simply color in the stencils around the card and then die cut the black outlined animal stamp of your choice! Add a black strip of cardstock with an embossed sentiment and now you have a fun little card!

Want to create a safari scene? Here is how you can make one: Find a grass die of your choice and cut three separate strips of grass using Altenew's gradient cardstocks (in green), next, die cut the animal stamps, place the animals on top of each green cut out to make it seem like they are peeping out of the grass (one of the left, center, and right side), place your sentiment on the upper right or lower right corner of your card, and voila!
