Wooden Swing
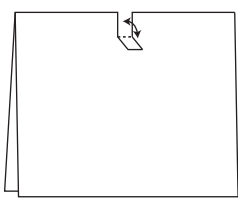

Pop-up

Thinking of you

Pop-up:

Use the alignment nubs on the side of the pop-up die to align it over the fold of any size card, anywhere along the fold. Minimum card size to hide the tree: 4" x 4.25" when folded. (10.2 cm x 10.8 cm)
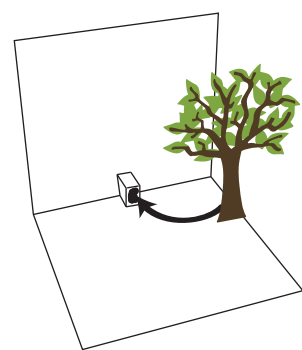

Train the pop-up by folding the card and then working the pop-up platform by folding it down and then back up again.

Assembly:

Open the card and invert the folds for the platform so it pops into the card as shown. Add adhesive to the front of the platform and press the tree to it. Attach the finished pop-up card inside a backing card.
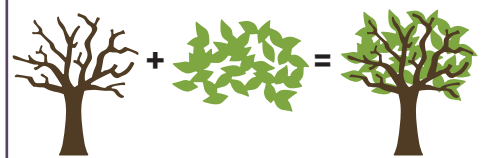

Swings:

Use string or twine to add the tire or wooden swing in the tree. The wooden swing die has an optional emboss feature. Use an embossing sandwich in the machine to add the texture.
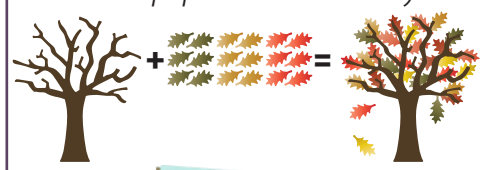

Tree Options:

Quick and easy: glue the large leaf piece behind the tree.

+ =

Custom look: glue individual leaves onto the branches. (*Hint: cut 12 leaves at a time by stacking two sheets of paper under the die*)
