

in cahoots with RILEY AND COMPANY

Double-stitching allows use of either side of edge

Die Cutting:

Edge dies cut just the edge of the paper and are perfect for making shaped cards and layered backgrounds.

Edge dies will cut 5.5" (14 cm) in width per pass. For longer pieces, simply move the die and continue die cutting. Choose your own height.

Grass:

Use the Grass Edge to make single strips and/or layered backgrounds. Try mixing pieces cut with the Grass Edge with pieces cut with the Hills Edge to create dimensional grassy fields.

Hills:

Use the Hills Edge to create hills, dirt, water, paths or snow. Try cutting pieces with both sides of the edge and then layering the pieces at different heights and angles.

Clouds:

Use the Clouds Edge to make layered skies. Try mixing the positive and negative edges for more dimension. Turn the upper edge over to use as waves and mountains.
