Cupcakes:

Liner base can be used flat OR fold on all the slats, starting with a valley fold, to create a pleated liner. The outer-most pleats can be glued to the card.

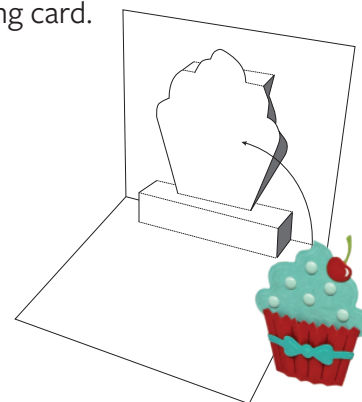

Pop-up:

Place the pop-up die over the fold of any size card. Make sure the alignment nubs on the die are positioned directly over the fold of the card and die cut. Minimum card size to hide the cupcake: 4" x 4.25" when folded. (10.2 cm x 10.8 cm)

Assembly:

Work the folds of the pop-up as shown, creating a pop-up lower box and a pop-up upper cupcake. Decorate the pop-up with decorator pieces as desired. Attach the finished pop-up card inside a backing card.
